

# New Pet Checklist

## Congratulations on welcoming a new furry friend into your home

Follow our handy checklist to give your new kitten or adult cat the essentials they need

1. **Health check & vaccinations** - Register your pet with our veterinary practice and book their health check and vaccinations to get them protected
2. **Parasite treatments** - A combination of vet-recommended flea & worm treatments is the best way to ward off parasites
3. **Neutering & microchip** - Talk to us about when to neuter and microchip your pet - get these booked in
4. **Indoor care** - Keep your new pet indoors until they have been fully vaccinated, neutered & microchipped
5. **Home comforts** - Your pet will need a comfy bed in a quiet and warm space and a carry basket for visiting the Vets. Some cats may prefer a choice of beds, or yours! A cat flap can be helpful too.
6. **Toilet training** - Supply a litter tray for each floor of the house (and each cat) and be patient if you need to train them to use this indoor toilet
7. **Insurance** - Pet insurance can help to get your pet the care they need if they become ill or injured
8. **Accessories** - It is wise to experiment with a collar and ID tag as young as possible to get them used to wearing one
9. **Nutrition** - Get a water and food bowl and talk to our team about the best food for your new pet's age and needs
10. **Enrichment** - Make your pet happy with enriching toys, a scratching post, and by getting them used to being groomed. They will like your company too.

We hope you found our checklist helpful - why not share it with friends looking to get a kitten or adopt an adult cat too?
